Lipoid Kosmetik - We make beauty natural.

Lipoid Kosmetik AG Switzerland, as part of the Lipoid group, is a leading manufacturer of high-quality actives and botanicals and supplier of phospholipid products for the cosmetic and personal care industry. As a pioneer in these fields, Lipoid Kosmetik has gained an outstanding reputation in the global cosmetic industry over the last 45 years. This long-standing expertise, in combination with the exceptional quality of our portfolio, enables our customers to develop market innovative, functional and natural cosmetic products meeting the highest standards.

Expertise

The Swiss-based Lipoid Kosmetik AG has been manufacturing high-quality botanical extracts since 1972.

R&D

Within the R&D facility in Switzerland, Lipoid Kosmetik develops innovative products and customized solutions in close cooperation with our partners.

Quality

Our quality system meets the highest standards set by the regulatory authorities and the cosmetic industry, Cosmetics GMP ISO 22716:2007 and ISO 9001:2015.

Regulatory

We assure the compliance of our products to national and international regulations and provide superior regulatory support to our customers.

Naturalness

We put a great emphasis on natural and organic ingredients, and provide a multitude of COSMOS-approved and COSMOS-certified products. In addition, we follow the guidelines of the new ISO 16128 to quantify the grade of naturalness of our products based on a self-declaration.

Sustainability

Since many years, Lipoid Kosmetik has been committed to the principles of sustainability, social responsibility and environmental protection. The efforts are continuously refined and documented in our Sustainability Report. Our CSR commitment has been evaluated and rewarded several times with a Gold Rating from the independent platform Ecovadis based on 21 CSR criteria.

Please be aware that the listed properties (medicinal or otherwise) that have been sourced from literature should be understood as value-added information only. No proof of statements by testing or otherwise will be provided by Lipoid Kosmetik AG (this excludes test data generated by Lipoid Kosmetik AG in support of our specific actives range). Other product properties identified and highlighted by specific tests or studies are to be interpreted in the context of the test/study conditions only. Product properties mentioned herein going beyond the product specifications are applicable unless the inherent uncertainty regarding the availability of herbal raw material (or its derivatives) compels a modification. Please be aware that the use of any claim on cosmetic products is the sole responsibility of the customer and is regulated by your local Regulatory Body.

Wide Range of Plant Raw Material

With more than 350 plants, a variety of plant parts and a global supplier network, Lipoid Kosmetik uses the diversity of the nature from all over the world for manufacturing actives and extracts. In combination with various solvent and preservation systems, we offer our customers an ever-growing choice of products.

Upon request we also source plants that are not yet offered and develop tailor-made solutions for you.

The broad range of our plant raw material, including a multitude of plant species and different plant parts, can be found in the product finder on [our homepage](#).

A non-exhaustive selection of our range of plant species is illustrated in the following:

	<p>More than 350 Plant Species</p> <ul style="list-style-type: none">• Well-known as well as exotic species• Plants from around the world• Habitats such as Alps, Coasts and Deserts
	<p>Numerous Plant Parts</p> <ul style="list-style-type: none">• Plant organs such as roots, leaves, flowers or bark• Specific developmental stages such as seeds or sprouts• Plant-derived products such as nectar or gum
	<p>Over 800 Products</p> <ul style="list-style-type: none">• Extraction of plant ingredients using a multitude of solvent systems• Extracts as liquid and dry versions available• Unique combination of plants in botanical actives

Actives and Botanicals for Cosmetic Applications

Plant-derived actives and extracts have a long tradition as cosmetic ingredients and are among the very first cosmetics. Lipoid Kosmetik has pioneered this field of natural cosmetic raw materials since 1972 and is today one of the leading suppliers of plant-derived actives and botanicals.

Actives

Botanical actives are cosmetic formulations with defined plant-derived active ingredients. The cosmetic efficacy of our actives has been carefully proven and documented by clinical *in vitro* and/ or *in vivo* studies.

>> Please consult also our phospholipid catalog.

Substantiated Extracts

The demand for extracts with claim substantiation is intensively growing on the cosmetic market. To meet this desire, we offer various activity-proven extracts, for which we provide phytochemical analysis and *in vitro* data.

Botanicals

Lipoid Kosmetik offers a wide range of liquid and dry extracts. Besides classical, organic and standardized qualities as well as cosmetic milks, we also develop tailor-made systems upon request. In addition, we provide a variety of natural additives, such as Swiss milk products, honey and abrasives.

Our Extraction Know-How

According to our long-standing expertise with a plethora of plant extracts and actives, we are firmly convinced that valuable cosmetic effects are mainly the result of a combined action of multiple plant substances. We thus provide ‘full-spectrum extracts’ aiming to concentrate all solvent-soluble molecules rather than merely concentrating a few particular metabolites. Our extraction processes respect the importance of a phytochemical diversity and are designed to maintain the phytochemical composition in all its variety.

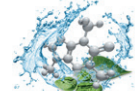

Our Full-Spectrum Extraction Technology

- Unique combination of energy-efficient, environment-friendly maceration and percolation techniques.
- Extremely mild process that allows to extract temperature-sensitive, value-giving constituents without undesired by-products such as colorings. This offers stable extracts, optimally balanced for extraction yield and formulation acceptance.
- Our manufacturing procedures are controlled under cosmetic GMP regulation ISO 22716, including very tight raw material specifications and an electronically controlled extraction system, allowing us to produce consistent extracts with very low batch-to-batch variation.
